

LONDON FOGGERS

WORLDWIDE VECTOR CONTROL SINCE 1968

COLT4 Portable ULV Fogger for Outdoor & Indoor Applications

The **Colt4** produces a true ULV droplet size, 90% of the droplets are less than 15 microns in diameter. The **Colt4** is a light weight compact design, weighing only 23 pounds with dimensions of 17" long X 12" wide and 13.5" tall. The **Colt4** is equipped with a heavy duty shoulder strap for the operators comfort. All components are selected for longevity and reliability. Finger tip controls offer simple and convenient operation along with a 4 cycle engine, which requires no mixing of the oil and gas. The 4 cycle engine is both powerful and very easily started. The flow rates can be adjusted for various materials or applications by changing an orifice disc. The **Colt** can atomize both oil or water based products. Tested with a laser based atomizer, the **Colt4** passes droplet tests with flying colors, and the new engine is just what you asked for, no mixing of the oil and gas!

Specifications

Engine	Air Cooled, 4 stroke, single cylinder. regular gasoline ONLY
Fuel Tank	20 Ounces, (.65 liters) (30-45 minute run time)
Compressor	Rotary, oil-less, 100% ball and roller bearing, graphite fins
Formulation Tank	One quart, 32 ounces (.946 L)
Formulation Output	Siphon nozzle with 3 orifice discs included
Formula Metering	Various orifices discs 3 sizes included
Particle Size	90% less than 15 microns
Weight	23 lbs dry (10.4 kg)
Length	17" (43.2 cm)
Width	12" (30.1 cm)
Height	13.5" (34.3 cm)
